The Lakelse Watershed Newsletter

# Hurry and book your seat now!

Only 1 seat left!

The Lakelse Watershed Stewards Society invites you to:

June 18 & 19, 2019 Terrace, BC

Learn about common invasives in our area during this 2-day workshop and find out how to identify them and prevent their spread. Open to everyone!

**Invasive Species** 

Council of BC

The Invasive Species Council of BC will be presenting a 2-day workshop about invasive plant and aquatic species on June 18 and 19. Register with Chera Barrowman as space is limited!

## The grand opening of the Clearwater interpretive trail was a success!

Everyone started at the trail head and made their way down to the upper lake, reading the signs along the way!

We had a booth with a fish viewing station and invertebrates at the upper lake! We found coho, stickelback, sculpin and cutthroat! Can you guess what two fish are below?

Chera demonstrating the water quality meter!

多的多品的品质

Cheryl and Cathy met with Parks regarding the possibility of a new trail near Blackwater Creek.

#### Lakelse Watershed Circuit

Are You a LWSS Member?
The cost of \$10 includes your whole family!
Your membership covers:
Insurance for injuries while working in the field and happiness! ©

This is our new summer student Tianna! She is graduating from Coast Mountain College and continuing her Environmental studies at UNBC. She is also a resident at Lakelse Lake!

Email chera.hrem@gmail.com
to add your name to our
volunteers list and come help
test water quality!

Summer (the old summer student) also came back to help with the sampling

## Lakelse Watershed Stewards Society

The mission of the Lakelse Watershed Stewards Society is to preserve and protect the quality and health of the Lakelse Watershed.

## About Us

The Lakelse Watershed Stewards Society is a volunteer, non-profit organization which was formed in 2002. The Society works on issues affecting the Lake and its surrounding watershed.

Fish Viewing Station at Lakelse Lake Provincial Park.

ome

Water Sampling at Lakelse Lake.

Bat Boxes at Furlong Bay and Clearwater Lakes.

## Volunteers are Always Welcome ©

How to Become a Member Contact Lakelse Watershed Stewards Society:

Box 124, Terrace, B.C. V8G 4A2

## We are working on a LWSS Pamphlet!

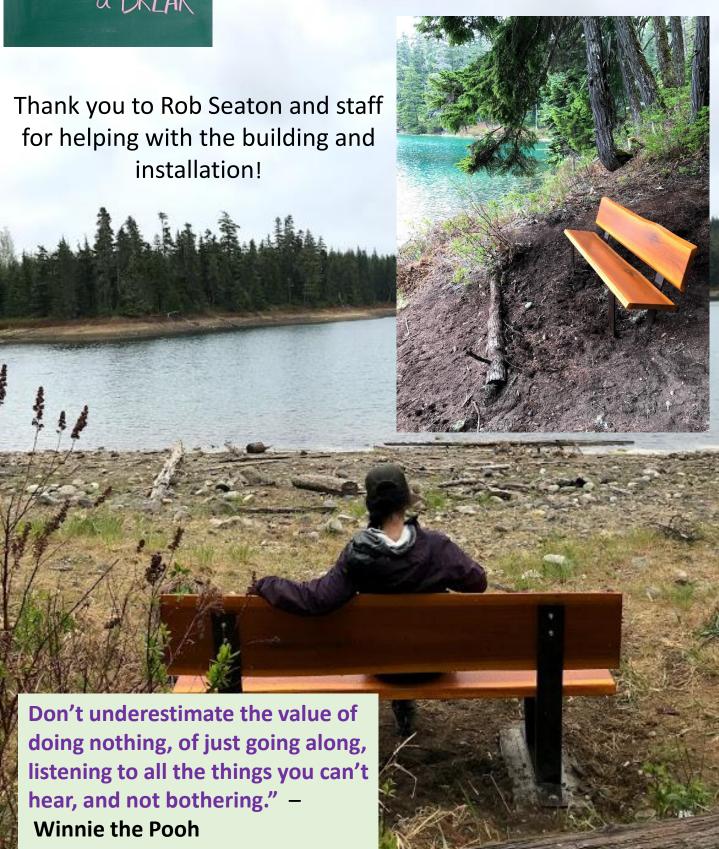

#### Our Goals

- 1. To identify current and potential sources of water quality degradation affecting the Lakelse System.
- 2. To monitor, preserve and enhance the quality and health of fish and their environment.
- 3. To provide options for managing the causes of lake degradation due to human impact.
- 4. To increase public awareness of watershed issues by promoting positive activities, information and resources to assist users and visitors in the proand maintenance of the existing ecosy

Got any great pics of the lake you would like to share?

# Take a break on the newly installed benches at the Clearwater Lakes Trail

## What Animal Did This?

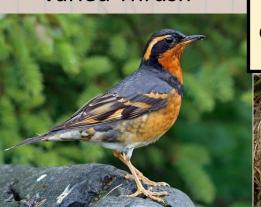

Check it out on the Clearwater Lakes Trail!

Answer: Flicker (bird species)

### **The American Robin**

Varied Thrush

Turdus migratorius
ORDER: Passeriformes
FAMILY: Turdidae

American Robin

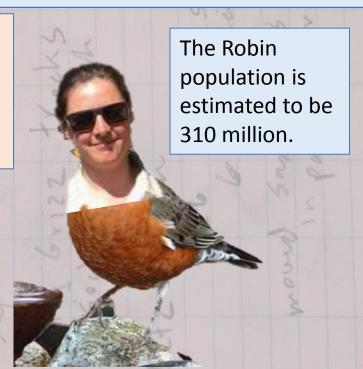

#### **Interesting Facts**

- The robin is often mistaken for the Varied Thrush.
- Robins are considered a sign of spring!
- The oldest American Robin was recorded to be 11 years and 11 months old!
- If you place a bird box in your yard you will attract a breeding pair!

American Robin are found throughout the continent including Canada, the United States and in Mexico. They eat earthworms, insects and fruits such as choke cherries and juniper berries.

American Robins nest in piles of leaves and branches or on the lower sections of trees. They are also found in gutters and eaves on buildings.

Another species of Robin has been seen around the office recently!

Starting in June, the interpretive walks at Furlong Bay will return for the fourth year in a row!

Additional information that will be included in the walks this year are invasive plants and invertebrate species information! Can you identify the invertebrate species below? If not, then come join the interpretive walks and you will!

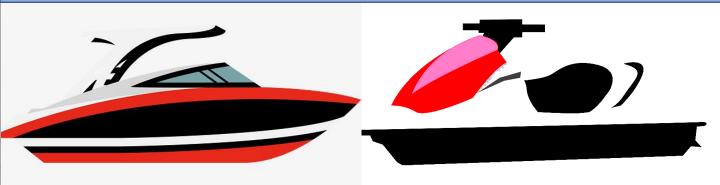

Lakelse Lake's ecosystem is a sensitive area. When boats and other watercrafts are operated in streams, the disturbance can cause damage to the vegetation, aquatic plants, fish habitat and have negative impacts on nesting waterfowl. Operating a watercraft in these sensitive zones can also pollute the water, disturb sediment, and cause shoreline erosion. Please stay out of the streams when operating your watercraft.

## **Volunteer Opportunities**

Would you be interested in sharing your boat for the day?
We are looking for someone to take us onto the lake to record water quality measurements!

We also are looking for someone to help set up the Scully camera and help with the watershed water quality circuit. If you are interested contact Chera at chera.hrem@gmail.com
